

## **E-911 Phase II Implementation Report**

SJI, Inc. ("SJI") hereby submits its report on its plans for implementing Phase II enhanced 911 service, pursuant to Section 20.18(i) of the Commission's rules, 47 C.F.R. § 20.18(i).

### **Background/Contact Information**

(1) Carrier Identifying Information:

SJI, Inc.  
112 West 10th Street  
Larose, LA 70373  
Phone: (504)693-4567  
Fax: (504)693-0230

No TRS number because not currently providing service.

(2): Contact Information:

Michelle Mundt  
Counsel for SJI, Inc.  
Mintz, Levin, Cohn, Ferris, Glovsky and Popeo, P.C.  
701 Pennsylvania Avenue, N.W.  
Washington, DC 20004  
Phone: (202)434-7300  
Fax: (202)434-7400  
Email: mmundt@mintz.com

### **E911 Phase II Location Technology Information**

(1) Type of Technology:

SJI is licensed to provide personal communications service ("PCS") in the Houma-Thibodaux MTA, but has not yet built out its PCS system.<sup>1/</sup> SJI therefore does not currently offer real time, two-way switched voice service that is interconnected with the public switched network. Because SJI is in the planning stage of network build out, it has not yet selected the Phase II location technology that it will deploy in its network. SJI will file an amended report once it selects its Phase II location technology.

---

<sup>1/</sup> SJI's five-year build out date is April 28, 2002.

(2) Testing and Verification:

Because SJI has not yet built out its network, it has not conducted any tests of the accuracy of any Phase II location technology. Once SJI has selected its Phase II location technology, it will follow the guidelines for determining accuracy of that technology in the FCC's OET Bulletin No. 71 (April 12, 2000).

(3) Implementation Details and Schedule:

SJI's strategy will be to purchase the necessary equipment (hardware and software) and services from the competitive marketplace and deploy such equipment and services under a schedule that is consistent with the FCC's rules, assuming the vendor of the selected technology is able to provide the necessary equipment and software in time.

(4) PSAP Interface:

SJI will transmit E-911 Phase II data through the public switched telephone network to PSAPs following industry standards adopted by the service supplier providing Phase II E-911 service to the PSAP.

(5) Existing Handsets:

Because SJI has not yet built out its network, it has not yet determined whether or how it will upgrade and/or replace existing customer handsets.

(6) Location of Non-Compatible Handsets:

Because SJI has not yet built out its network, it has not yet determined whether or how it will locate non-compatible handsets.

(7) Other Information:

Because SJI is not yet providing service, it has not received any Phase II requests from PSAPs.
